Forecast for Wednesday 27 Oct 2021

Weather: Drizzly outbreaks on the hills overnight and staying overcast. A mix of periods of light and patchy rain on the western hills and some drier weather in the east however remaining overcast here.

Chance of cloud free mountain/hill tops above 600m: 20% chance in the west, extensive low cloud will affect hills to the west especially in the morning, best chance of cloud free tops will be more eastern areas with a 50% chance of cloud free tops.

Visibility: Broken or extensive cloud above 400m in the west for the morning period, perhaps more broken or scattered low cloud above 500m for the eastern hills. Visibility below cloud will be poor in patchy rain in the west but moderate or good for most of the day in the east but it will seem quite dull at times.

14:00 on Tue 26 Oct 2021	4mm	15.8mm	18.6mm

Forecast for Thursday 28 Oct 2021

Weather: Persistent rain is expected to move east over the Brecon Beacons on Thursday, perhaps the far eastern hills remaining dry for much of the day.

Maximum wind: Strong southerly winds. 25mph with gusts 35-40mph.

Chance of cloud free mountain/hill tops above 600m: 20%, extensive low cloud associated with rain, best chance of clear tops in the east of the Brecon Beacons.

Visibility: Generally poor throughout the day associated with rain, perhaps becoming moderate in the east later. Cloud will be broken above 400m for much of the day in the west, perhaps scattered above 500m in the east.

Temperature: **Valleys:** Plus 14 Celsius.
At 600m: Plus 11 Celsius.
Freezing level: Above all summits.
